

# Database System Engineering and Distributed Backend Development

## Week-4

The image displays the Swagger Editor interface for the 'BookFlow Search API'. The left pane shows the OpenAPI 3.0.3 definition in JSON format, and the right pane shows the interactive UI for the GET endpoint.

**OpenAPI Definition (Left Pane):**

```
1 openapi: 3.0.3
2
3 info:
4   title: BookFlow Search API
5   version: 1.0.0
6   description: API contract for semantic book search
7
8 paths:
9   /v1/books/search:
10     get:
11       summary: Search books semantically
12       operationId: searchBooks
13       parameters:
14         - name: q
15           in: query
16           required: true
17           description: Natural-language search query
18         - name: limit
19           in: query
20           required: false
21           description: Maximum number of results
22       schema:
23         type: string
24         minLength: 1
```

**Interactive UI (Right Pane):**

**BookFlow Search API** 1.0.0 OpenAPI 3.0

API contract for semantic book search

**default**

**GET** **/v1/books/search** Search books semantically

**Parameters**

| Name                                     | Description                   |
|------------------------------------------|-------------------------------|
| <b>q</b> * required<br>string<br>(query) | Natural-language search query |
| limit<br>integer<br>(query)              | Maximum number of results     |

**Execute** **Clear**

**Responses**

**curl**

```
curl -X 'GET' \
  'https://editor.swagger.io/v1/books/search?q=Stories2about2space&limit=3' \
  -H 'accept: application/json'
```

**Request URL**

```
https://editor.swagger.io/v1/books/search?q=Stories2about2space&limit=3
```

**Server response**

## Responses
